3	English	ProQuest Arts & Humanities Database (Journal full text) - Access via Ming Chi IP	Until December 31, 2024

FAQ

Q1: How is Ming Chi IP connection determined?

1. **Wired Connection:** Using a wired network in the dormitories, teaching areas, and administrative areas, with the default IP set to Ming Chi.
2. **Wi-Fi Connection:** On mobile, select the "MCUT 802.1X" Wi-Fi and log in with your campus portal account and password. For details, refer to the Wi-Fi Guide [\[LINK\]](#).
3. **VPN Connection:** If Wi-Fi is unavailable or you are off-campus, use the Ming Chi VPN. Follow the VPN Guide [\[LINK\]](#) to download the Cisco software for computer or mobile, and log in with your campus account.

Q2: Issues accessing databases on a wired network within campus

Possible reasons include:

1. External VPN Interference: If connected to an external VPN, the IP may be recognized as non-Ming Chi IP.
2. IP Range Issues: The IP range settings by the database provider may have changed.
3. Other Issues: If other connection issues arise, please contact the library for assist.
