REVIEW

## Broad-spectrum coronavirus antiviral drug discovery

Allison L. Totura and Sina Bavari

Division of Molecular and Translational Sciences, United States Army Medical Research Institute of Infectious Diseases, Fort Detrick, MD, USA

**ABSTRACT**

**Introduction**: The highly pathogenic coronaviruses severe acute respiratory syndrome coronavirus (SARS-CoV) and Middle East respiratory syndrome coronavirus (MERS-CoV) are lethal zoonotic viruses that have emerged into human populations these past 15 years. These coronaviruses are associated with novel respiratory syndromes that spread from person-to-person via close contact, resulting in high morbidity and mortality caused by the progression to Acute Respiratory Distress Syndrome (ARDS).

**Areas covered**: The risks of re-emergence of SARS-CoV from bat reservoir hosts, the persistence of MERS-CoV circulation, and the potential for future emergence of novel coronaviruses indicate antiviral drug discovery will require activity against multiple coronaviruses. In this review, approaches that antagonize viral nonstructural proteins, neutralize structural proteins, or modulate essential host elements of viral infection with varying levels of efficacy in models of highly pathogenic coronavirus disease are discussed.

**Expert opinion**: Treatment of SARS and MERS in outbreak settings has focused on therapeutics with general antiviral activity and good safety profiles rather than efficacy data provided by cellular, rodent, or nonhuman primate models of highly pathogenic coronavirus infection. Based on lessons learned from SARS and MERS outbreaks, lack of drugs capable of pan-coronavirus antiviral activity increases the vulnerability of public health systems to a highly pathogenic coronavirus pandemic.

**ARTICLE HISTORY**
Received 16 August 2018
Accepted 7 February 2019

**KEYWORDS**
Antiviral; ARDS; acute respiratory distress syndrome; bat; broad-spectrum; camel; civet; coronavirus; emerging virus; highly pathogenic virus; human cases; interferon; in vitro model; lopinavir; MERS; MERS-CoV; Middle East respiratory syndrome; pneumonia; primate model; respiratory; ribavirin; rodent model; SARS; SARS-CoV; severe acute respiratory syndrome; therapeutic; zoonosis; zoonotic

請問這篇文章的重點是什麼?

**文章重點探討**

**文章重點**

- **廣泛性抗病毒藥物**：文章探討了針對冠狀病毒（如SARS-CoV和MERS-CoV）開發廣泛性抗病毒藥物的必要性，這些藥物應對多種冠狀病毒有效，以應對未來可能出現的新冠狀病毒。
- **研究方法**：文中提到多種藥物發現的方法，包括針對病毒非結構蛋白的抑制劑，以及中和結構蛋白或調節宿主因子的方法，這些方法在動物模型中顯示出不同程度的療效。
- **公共健康挑戰**：文章強調缺乏能夠有效對抗多種冠狀病毒的療法使公共健康系統在面對大流行時變得脆弱，並呼籲加強相關的藥物開發和研究。

- **方法論**：提出了一種基於多頭深度神經網絡（Multi-head DNN）的聯邦學習（Federated Learning）算法，解決了用戶設備環境的異質性及通信帶寬的限制，從而提高RSRP預測的性能和通信效率。
- **實驗結果**：實驗顯示，所提出的多頭聯邦學習算法在降低全局測試損失和通信成本方面，較傳統的聯邦平均算法（FedAVG）有顯著改進，具體數據顯示可減少測試損失38.6%和通信成本62.7%。
- **結論與未來工作**：研究表明，利用AI技術進行RSRP預測在6G網絡中至關重要，未來將進一步探索更多複雜模型及不同數據集的應用，以增強算法的性能和效果。

#### Abstract

Background: Artificial intelligence technologies are one of the most important technologies of today. Developments in artificial intelligence technologies have widespread and increased the use of artificial intelligence in many areas. The field of health is also one of the areas where artificial intelligence technologies are widely used. For this reason, it is considered important that healthcare professionals be prepared for artificial intelligence and do not experience problems while training them. In this study, midwife and nurse candidates, as future healthcare professionals, were discussed. Aim: This study aims to examine the effect of the artificial intelligence readiness on the artificial intelligence anxiety and the effect of artificial intelligence characteristic variables (artificial intelligence knowledge, daily life, occupational threat, artificial intelligence trust) on the medical artificial intelligence readiness and artificial intelligence anxiety of students. Methods: This study was planned and carried out as a relational survey study, which is a quantitative research. A total of 480 students, consisting of 240 nursing and 240 midwifery students, were included in this study. SPSS 26.0 and

張仁杰, 2024 #12 Summary Edit PDF

### 探索人工智慧素養、情感、擬人化如何影響用戶對人工智慧工具的使用意圖之研究：以ChatGPT為例

張仁杰

企業管理學系碩士班
2024
Pages 95

#### Links

https://hdl.handle.net/11296/zxtk69

#### Abstract

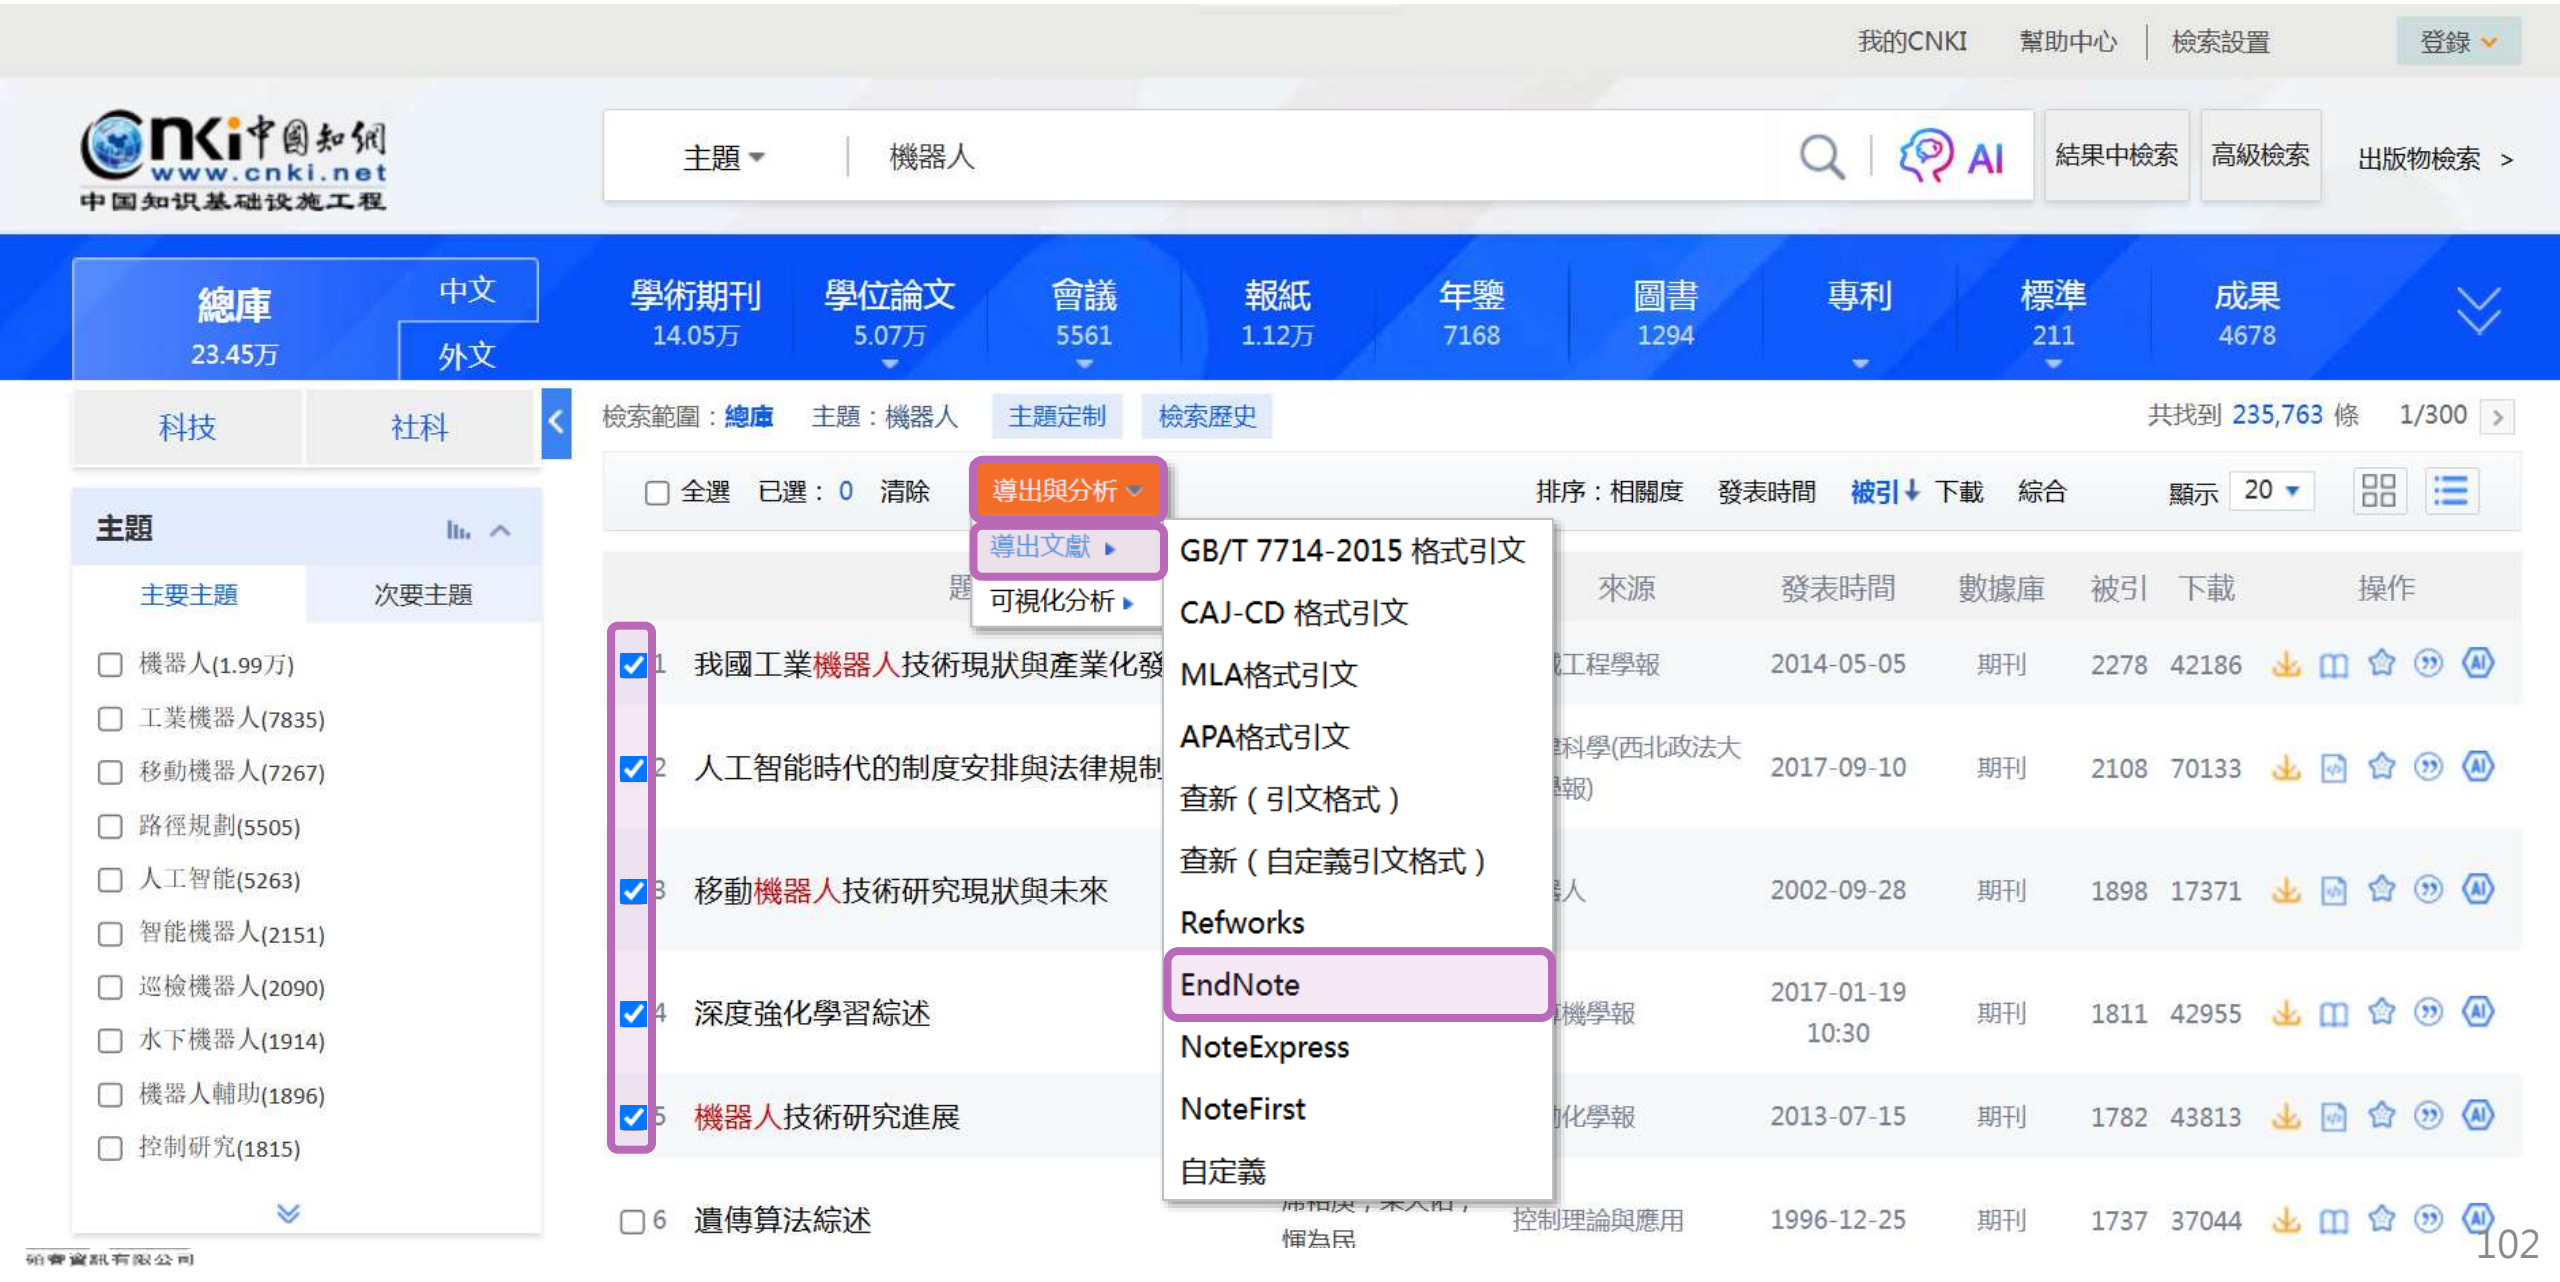

近年來，伴隨著ChatGPT的問世以及人工智慧科技的快速發展，有許多企業紛紛導入人工智慧工具用以解決商業問題，在我們的生活中也出現眾多的人工智慧產品。許多的公司及研發者想要搭上這波人工智慧浪潮，開發出各領域的人工智慧產品，期盼能受到用戶青睞。然而，要讓陌生用戶願意使用新科技、新產品絕非易事。 本研究以用戶角度切入，探索使用者對於人工智慧工具之意識、用法、評估、倫理等能力，而這些能力統稱為「人工智慧素養」，除此之外，人工智慧工具之擬人化、情感是否會影響使用者對其之態度，進而影響使用者之使用意圖，皆為本研究之研究問題。本文旨在探討人工智慧素養、情感、擬人化是如何影響用戶對人工智慧工具的使用意圖的。 本研究以ChatGPT為基礎，以線上問卷蒐集資料方式進行實證研究，共回收470份問卷。研究結果顯示人工智慧素養用法、人工智慧素養評估、擬人化、情感會正向影響使用者對人工智慧工具之績效預期、努力期望；而績效預期、努力期望、擬人化會影響使用者對人工智慧工具的態度，且態度最終會影響使用者對人工智慧工具之使用意圖，研究結果可供產品開發者及企業管理者作為參考。
In recent years, with the advent of ChatGPT and the rapid development of arti-ficial intelligence （AI） technology, many companies have embraced AI tools to address business challenges. Consequently,

我國工業機器人技術現狀與產業化發展戰略
王田苗 & 陶永
機械工程學報
2014
Issue 09 Pages 1-13
Abstract
隨著工業機器人的快速發展,其在汽車制造、機械加工、焊接、上下料、磨削拋光、搬運碼垛、裝配、噴涂等作業中得到越來越多的應用。結合在機器人領域的相關工作,在分析國內外關于工業機器人發展現狀的基礎上,就工業機器人目前涉及的靈巧操作、自主導航、環境感知、人機交互與安全性等前沿技術的研究做簡要的綜述。提出我國工業機器人產業發展的若干思考和建議,希望能夠在把握國內外工業機器人前沿技術發展動態的同時,為發展我國工業機器人技術與產業提供相關戰略思考與建議。

Highly compressible 3D periodic graphene aerogel microlattices
Cheng Zhu[1], T. Yong-Jin Han[1], Eric B. Duoss[1], Alexandra M. Golobic[1], Joshua D. Kuntz[1], Christopher M. Spadaccini[1] & Marcus A. Worsley[1]
Graphene is a two-dimensional material that offers a unique combination of low density, exceptional mechanical properties, large surface area and excellent electrical conductivity. Recent progress has produced bulk 3D assemblies of graphene, such as graphene aerogels, but they possess purely stochastic porous networks, which limit their performance compared with the potential of an engineered architecture. Here we report the fabrication of periodic graphene aerogel microlattices, possessing an engineered architecture via a 3D printing technique known as direct ink writing. The 3D printed graphene aerogels are lightweight, highly conductive and exhibit supercompressibility (up to 90% compressive strain). Moreover, the Young's moduli of the 3D printed graphene aerogels show an order of magnitude improvement over bulk graphene materials with comparable geometric density and possess large surface areas. Adapting the 3D printing technique to graphene aerogels realizes the possibility of fabricating a myriad of complex aerogel architectures for a broad range of applications.

Abstract
- Background Garlic is alleged to have antimicrobial and antiviral properties that relieve the common cold, among other beneficial effects. There is widespread usage of garlic supplements. The common cold is associated with significant morbidity and economic consequences. On average, children have six to eight colds per year and adults have two to four. Objectives To determine whether garlic ( Allium sativum ) is effective for the prevention or treatment of the common cold, when compared to placebo, no treatment or other treatments. Search methods We searched CENTRAL (2014, Issue 7), OLDMEDLINE (1950 to 1965), MEDLINE (January 1966 to July week 5, 2014), EMBASE (1974 to August 2014) and AMED (1985 to August 2014). Selection criteria Randomised controlled trials of common cold prevention and treatment comparing garlic with placebo, no treatment or standard treatment. Data collection

Abstract
EndNote 2025推出了旨在優化研究和寫作過程的全新工具，以協助研究人員輕鬆應對耗時任務，更快達成研究目標。 新版解決方案的發佈標榜著人工智慧功能首次內建到EndNote。30多年來，研究人員始終依賴EndNote簡化其研究和寫作過程。 隨著EndNote 2025的推出，更先進的文獻管理工具嶄新問世，一系列高階人工智慧功能也包含其中，這些工具將進一步提升管理性任務的效率，讓研究人員能夠專注於自己的科研構想。 EndNote 2025是值得信賴的解決方案，能說明使用者保證論文質量和準確性，還能讓研究和寫作過程的各個階段更加高效省時、井然有序。

# 管理書目資料 – Groups

# 管理書目資料 – Groups

使用者可以透過 EndNote Library 中的 Groups 功能，**分類管理**個人 EndNote Library 中的書目資料。

# Groups 的三種型態

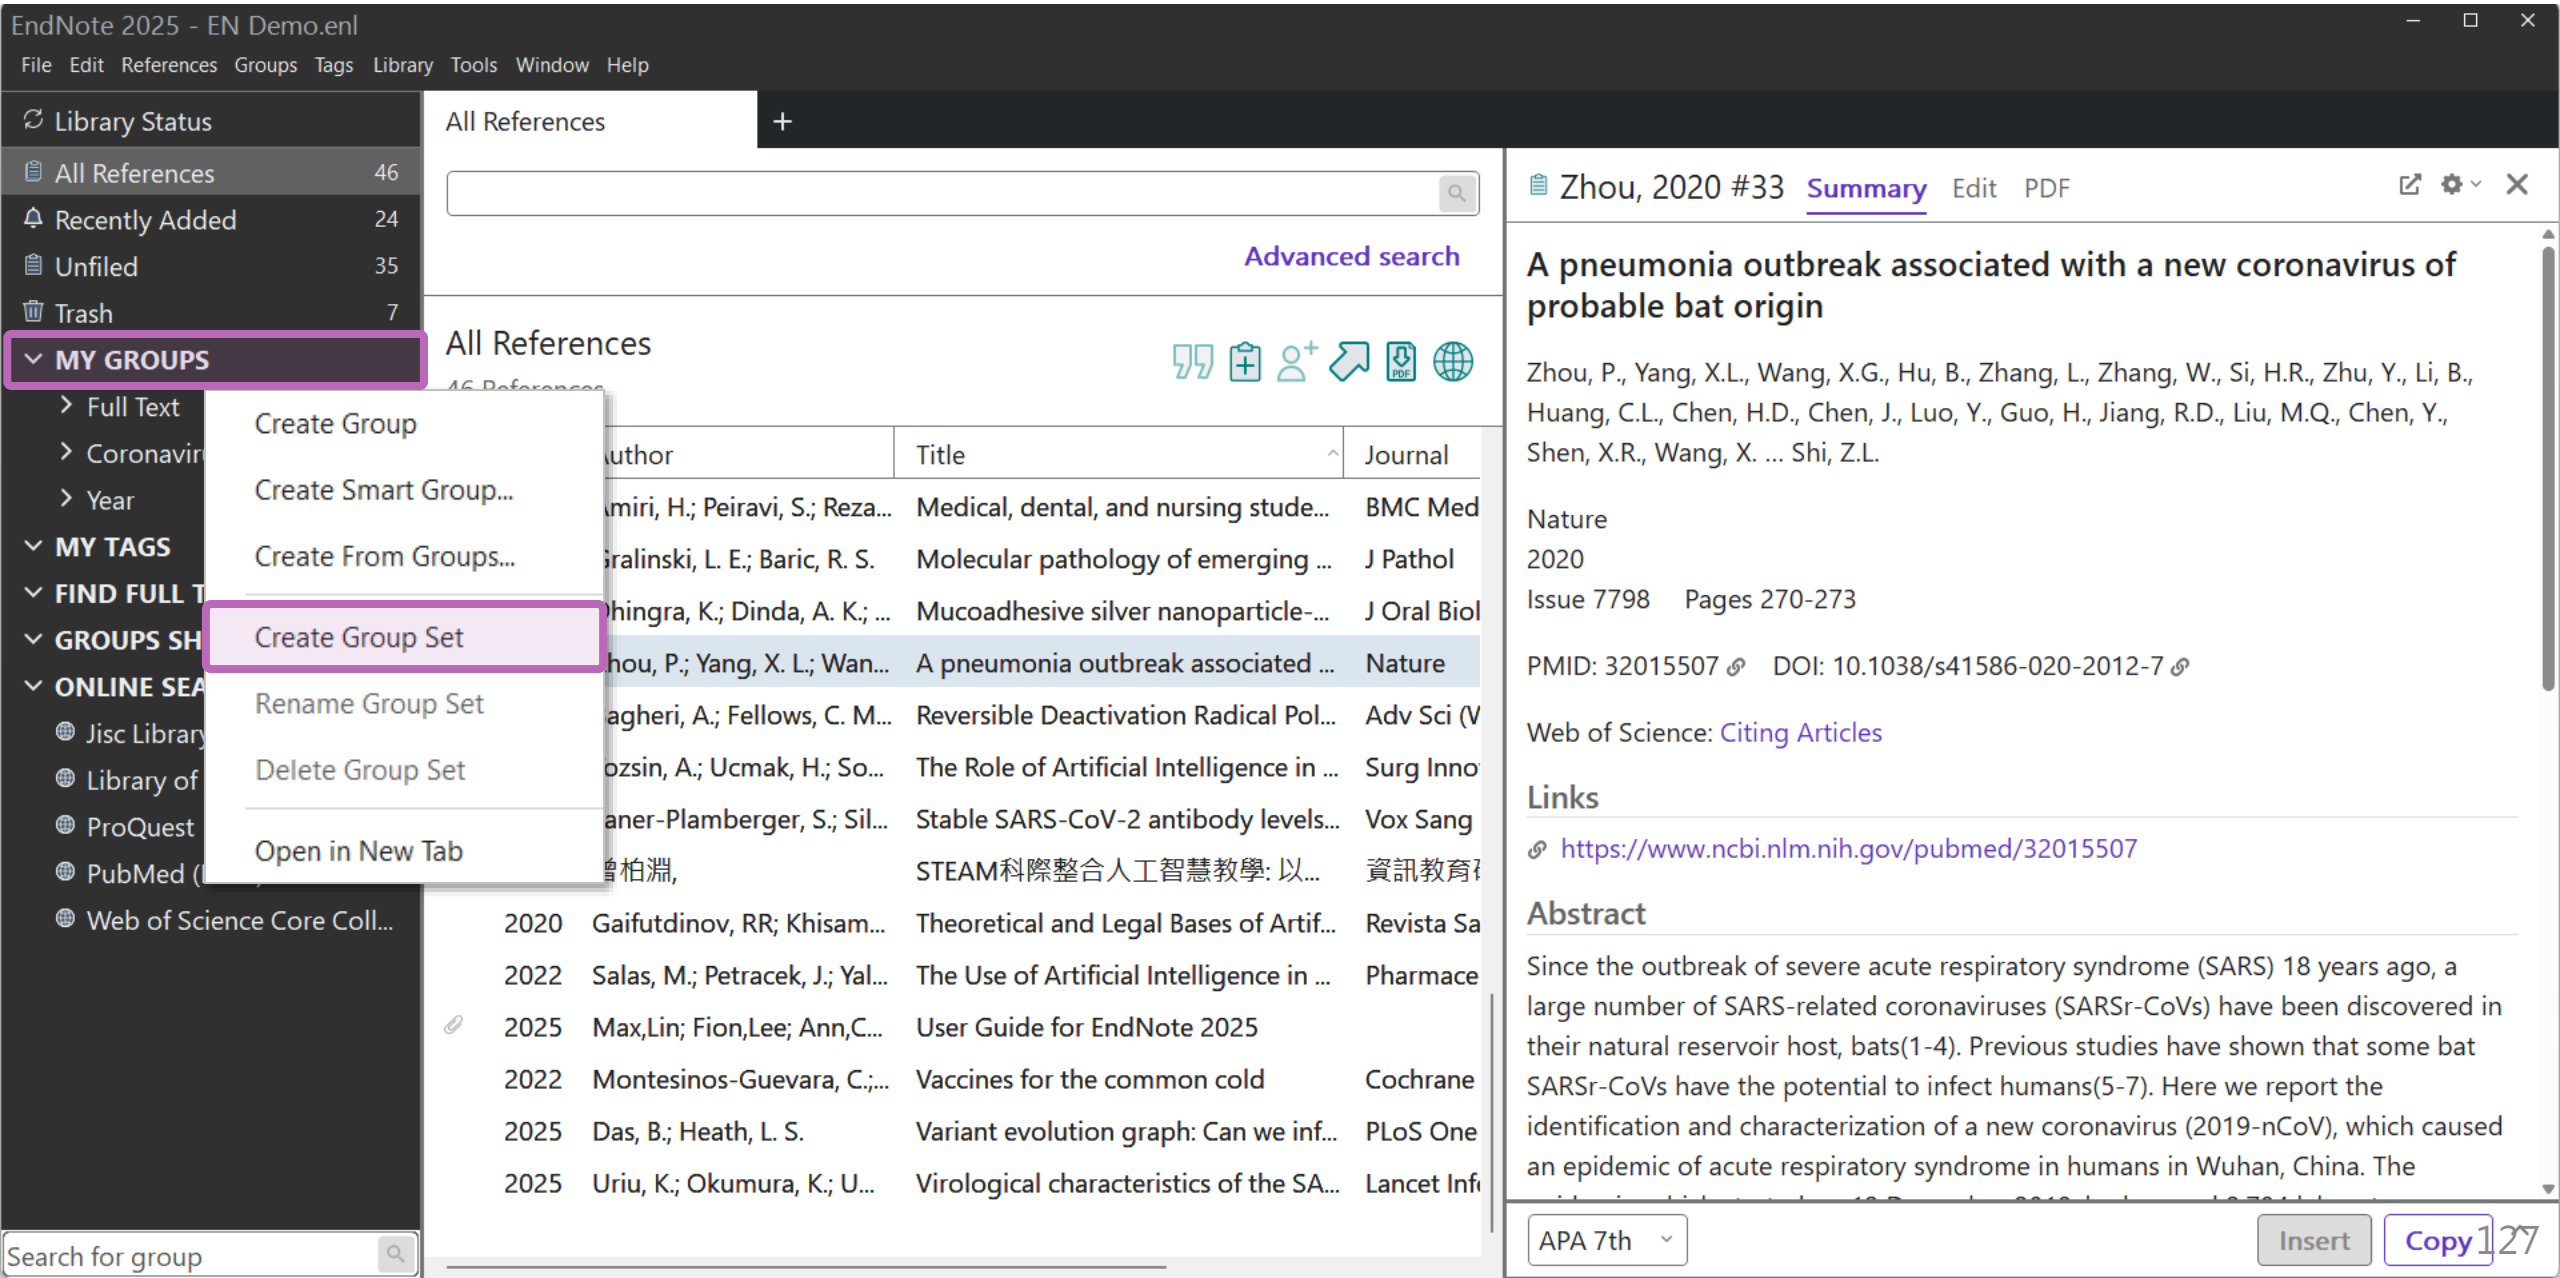

**Group (一般群組):**
使用者自訂分類。

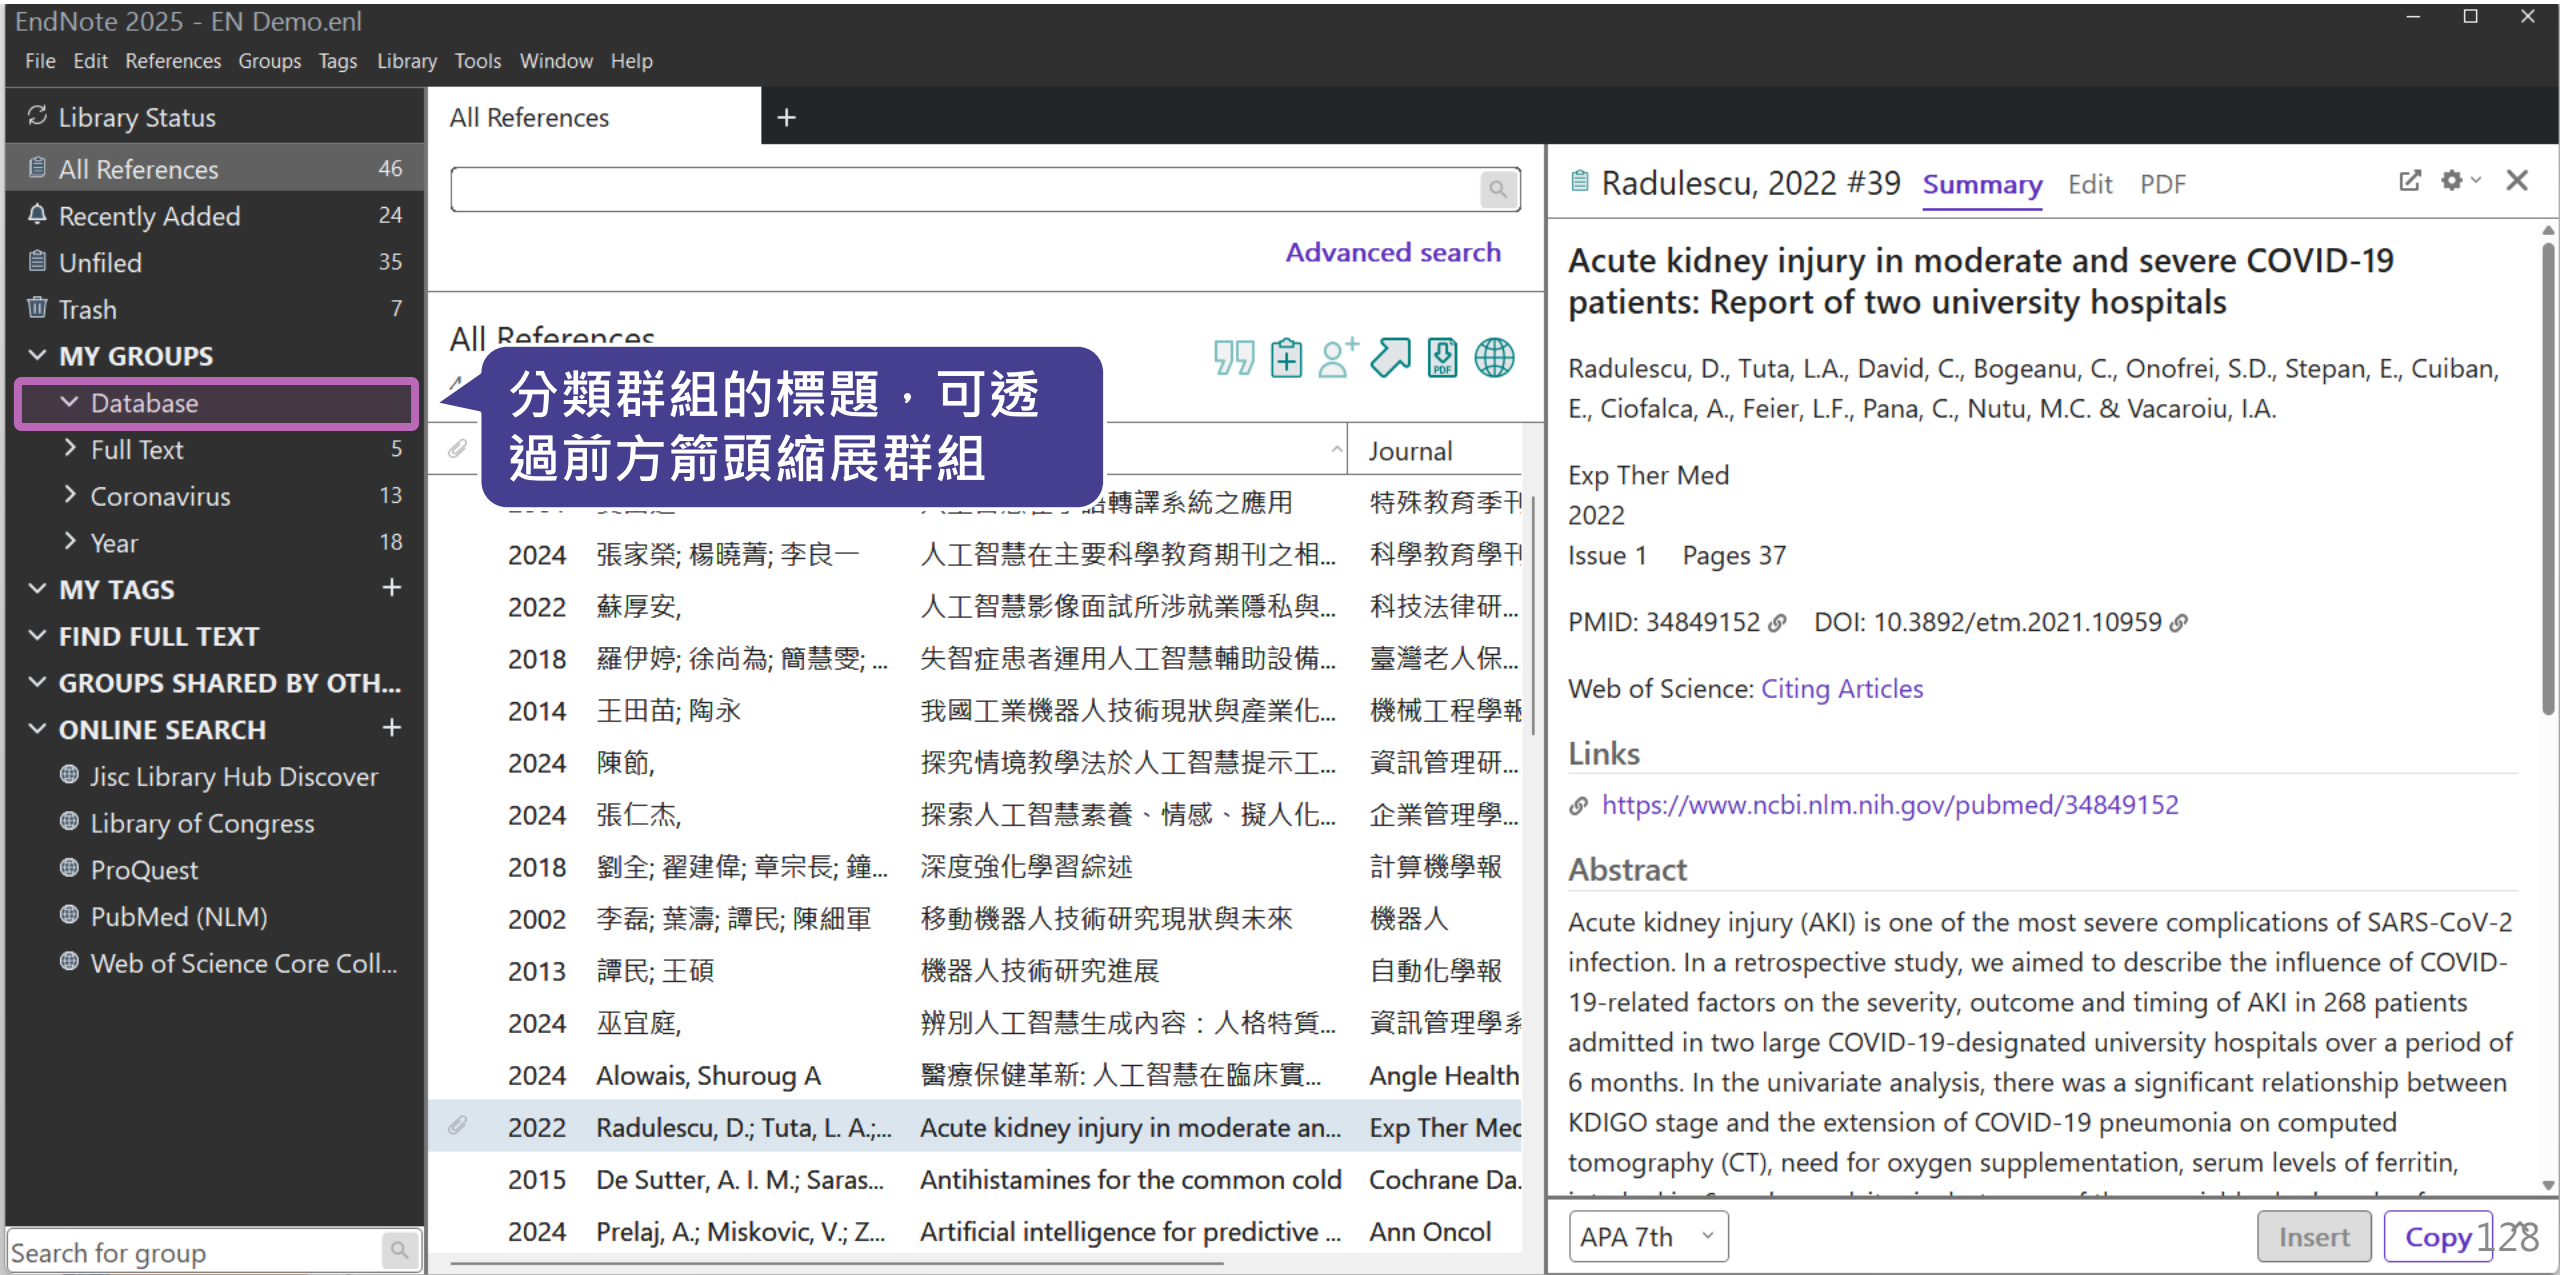

**Smart Group (智慧群組):**
使用者訂下篩選條件，符合的文獻資料自動進入該群組。

**From Groups (集合群組):**
利用現用群組進行交集、聯集或是排除而產生的群組分類。

Abstract
Acute kidney injury (AKI) is one of the most severe complications of SARS-CoV-2 infection. In a retrospective study, we aimed to describe the influence of COVID-19-related factors on the severity, outcome and timing of AKI in 268 patients admitted in two large COVID-19-designated university hospitals over a period of 6 months. In the univariate analysis, there was a significant relationship between KDIGO stage and the extension of COVID-19 pneumonia on computed tomography (CT), need for oxygen supplementation, serum levels of ferritin,

Abstract
Beginning in early 2021, unique and highly divergent lineages of SARS-CoV-2 were sporadically found in wastewater sewersheds using a sequencing strategy focused on amplifying the most rapidly evolving region of SARS-CoV-2, the receptor binding domain (RBD). Because these RBD sequences did not match known circulating strains and their source was not known, we termed them "cryptic lineages". To date, more than 20 cryptic lineages have been identified using the RBD-focused sequencing strategy. Here, we identified and

**Taking a breath**

Breathing is deeply connected to the brain. Every inhalation and exhalation is coordinated to supply the oxygen needed for the brain to manage the body's systems (Bagheri et al., 2021; O'Malley, 2022; Salas et al., 2022; Zhou et al., 2020).

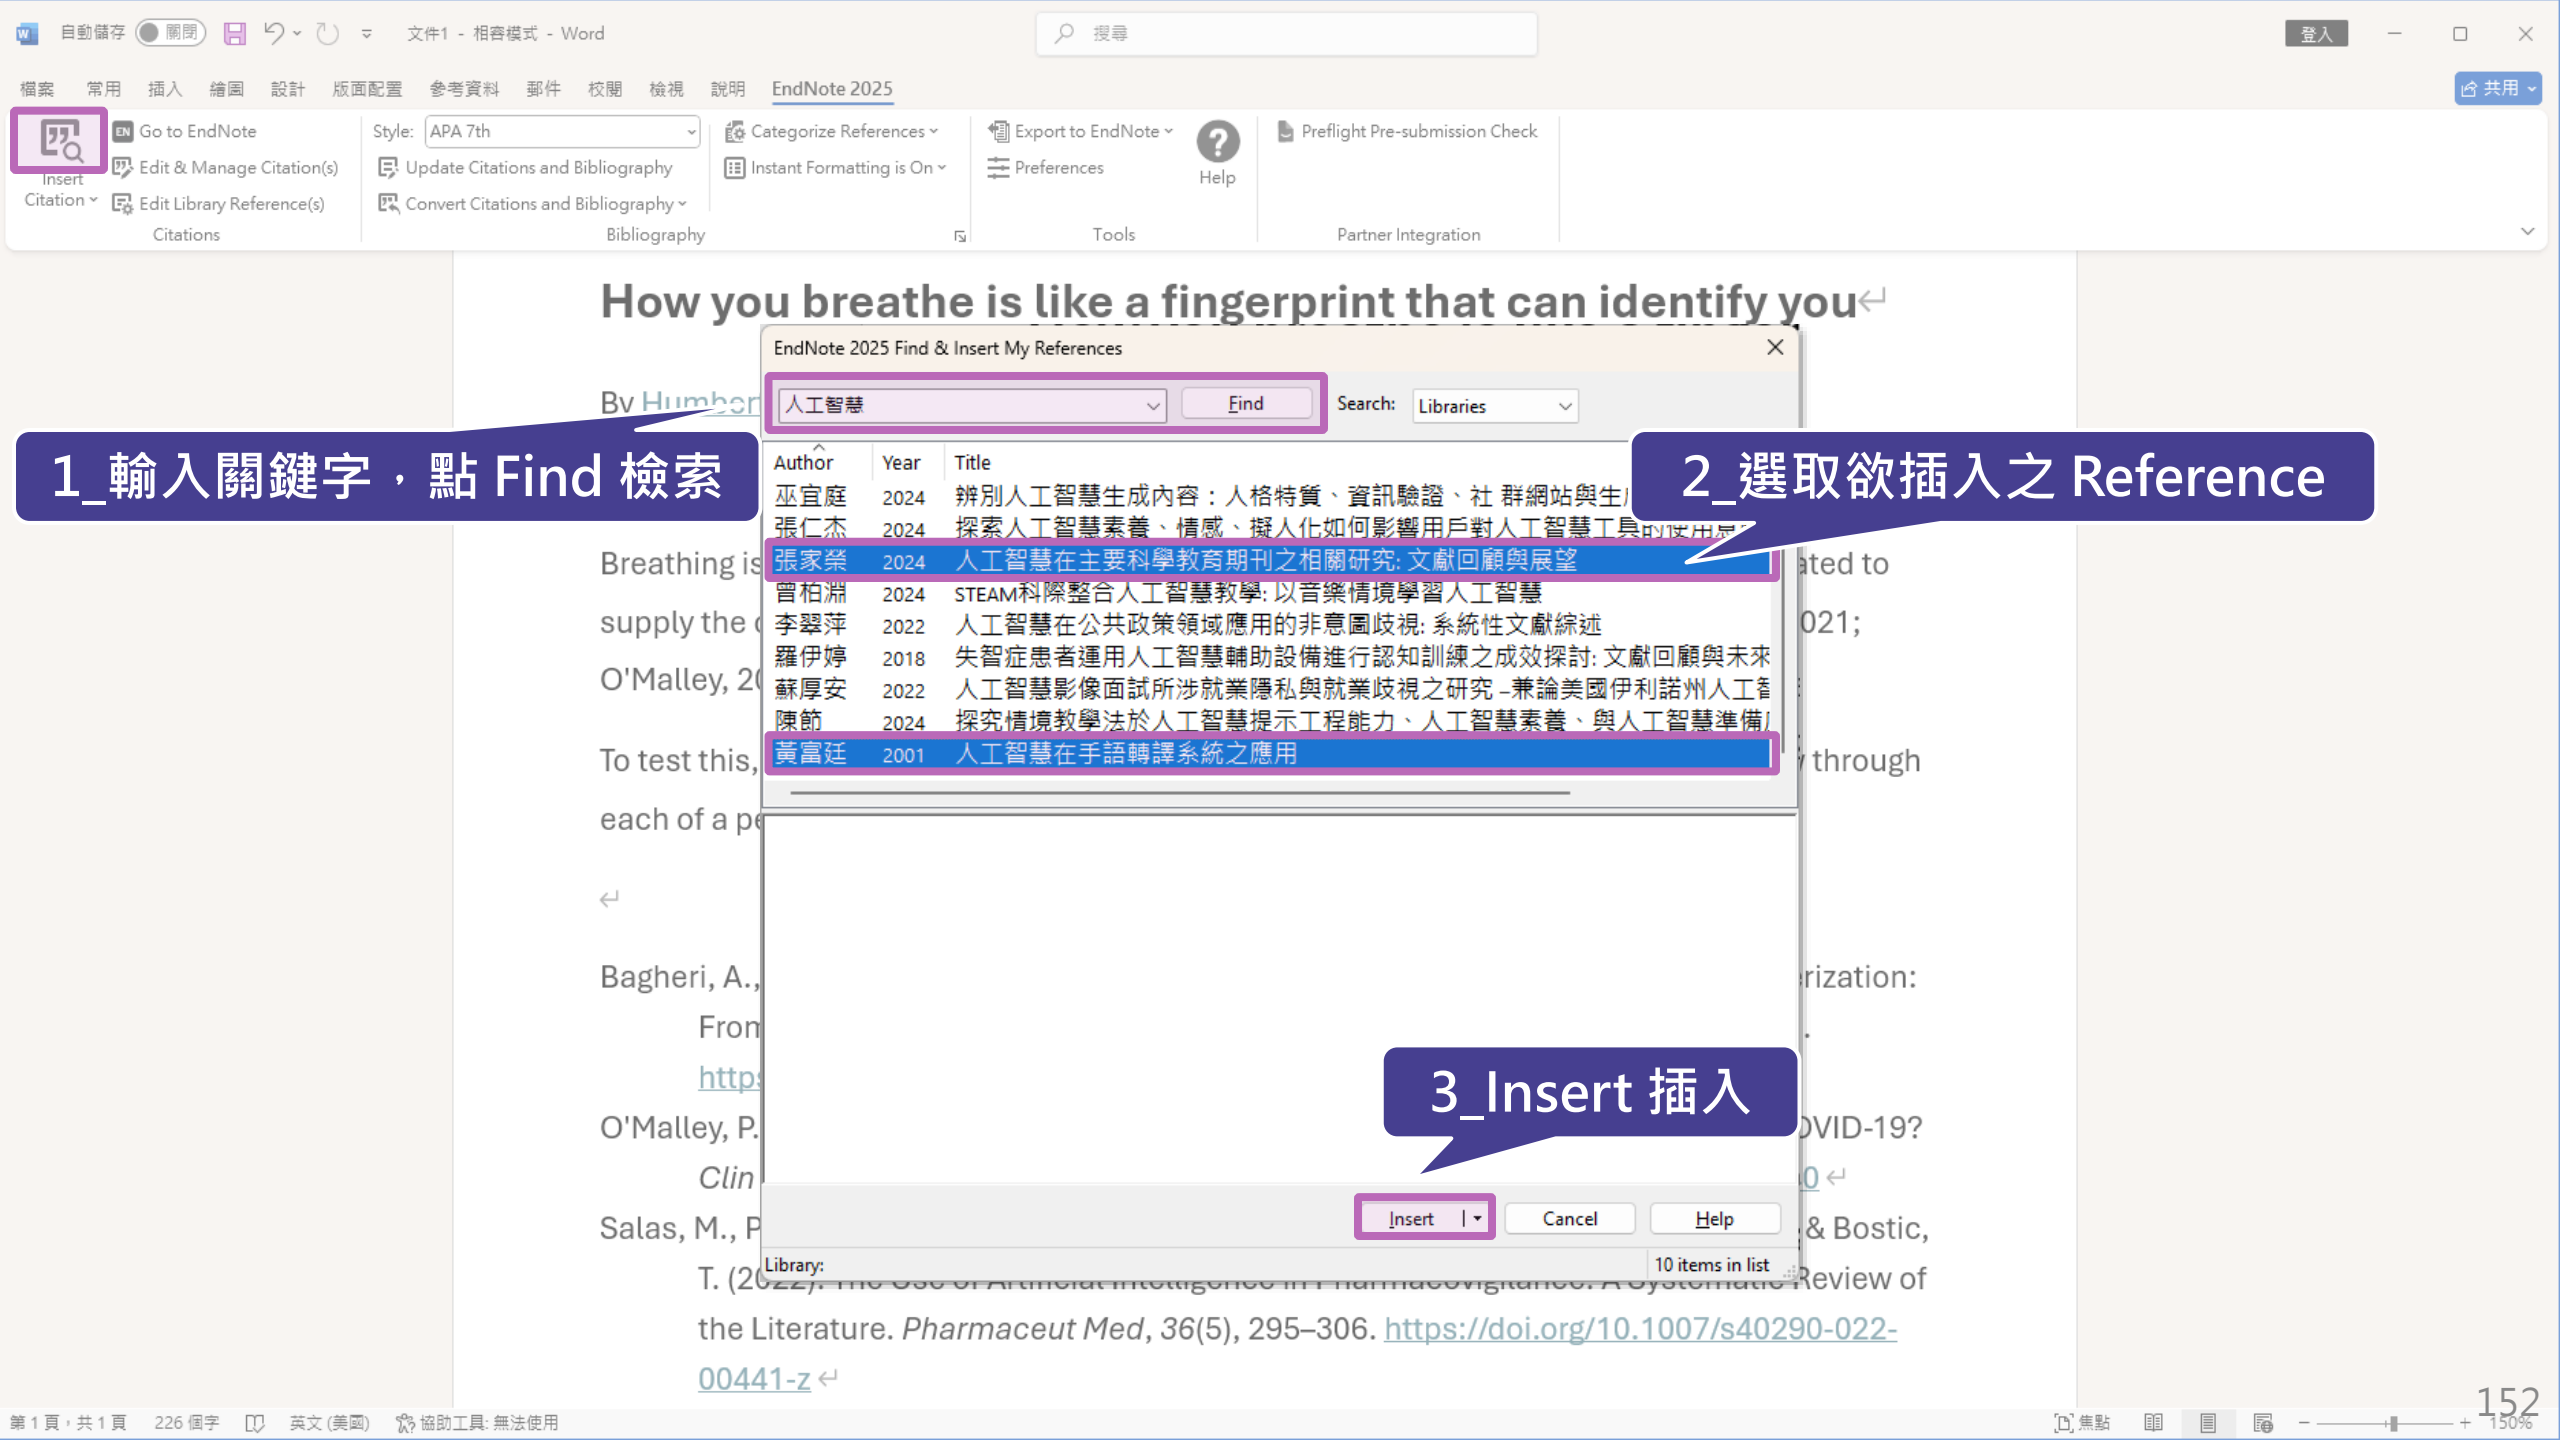

To test this, the researchers developed a custom, wearable device that records airflow through each of a person's nostrils.

# How you breathe is like a fingerprint that can identify you

By Humberto Basilio

**Taking a breath**

Breathing is deeply connected to the brain. Every inhalation and exhalation is coordinated to supply the oxygen needed for the brain to manage the body's systems(Bagheri et al., 2021; O'Malley, 2022; Salas et al., 2022; Zhou et al., 2020).

To test this, the researchers developed a custom, wearable device that records airflow through each of a person's nostril(張家榮 et al., 2024; 黃富廷, 2001).

# 分享對象至信箱收邀請信

Invitation to share an EndNote library 外部 收件匣 ×

**noreply@endnote.com**
寄給 我

下午2:34 (1 分鐘前)

Public (jamie@demo.sydt.com.tw) would like to share an EndNote library with you.

To accept this invitation and access Public 's library, you must have EndNote X7.2 or later installed, and we strongly recommend using the latest version of EndNote for the best experience.

Once you've accepted this invitation, you will be able to access all of the references, PDFs, file attachments, and notes in this shared library from your EndNote desktop application.

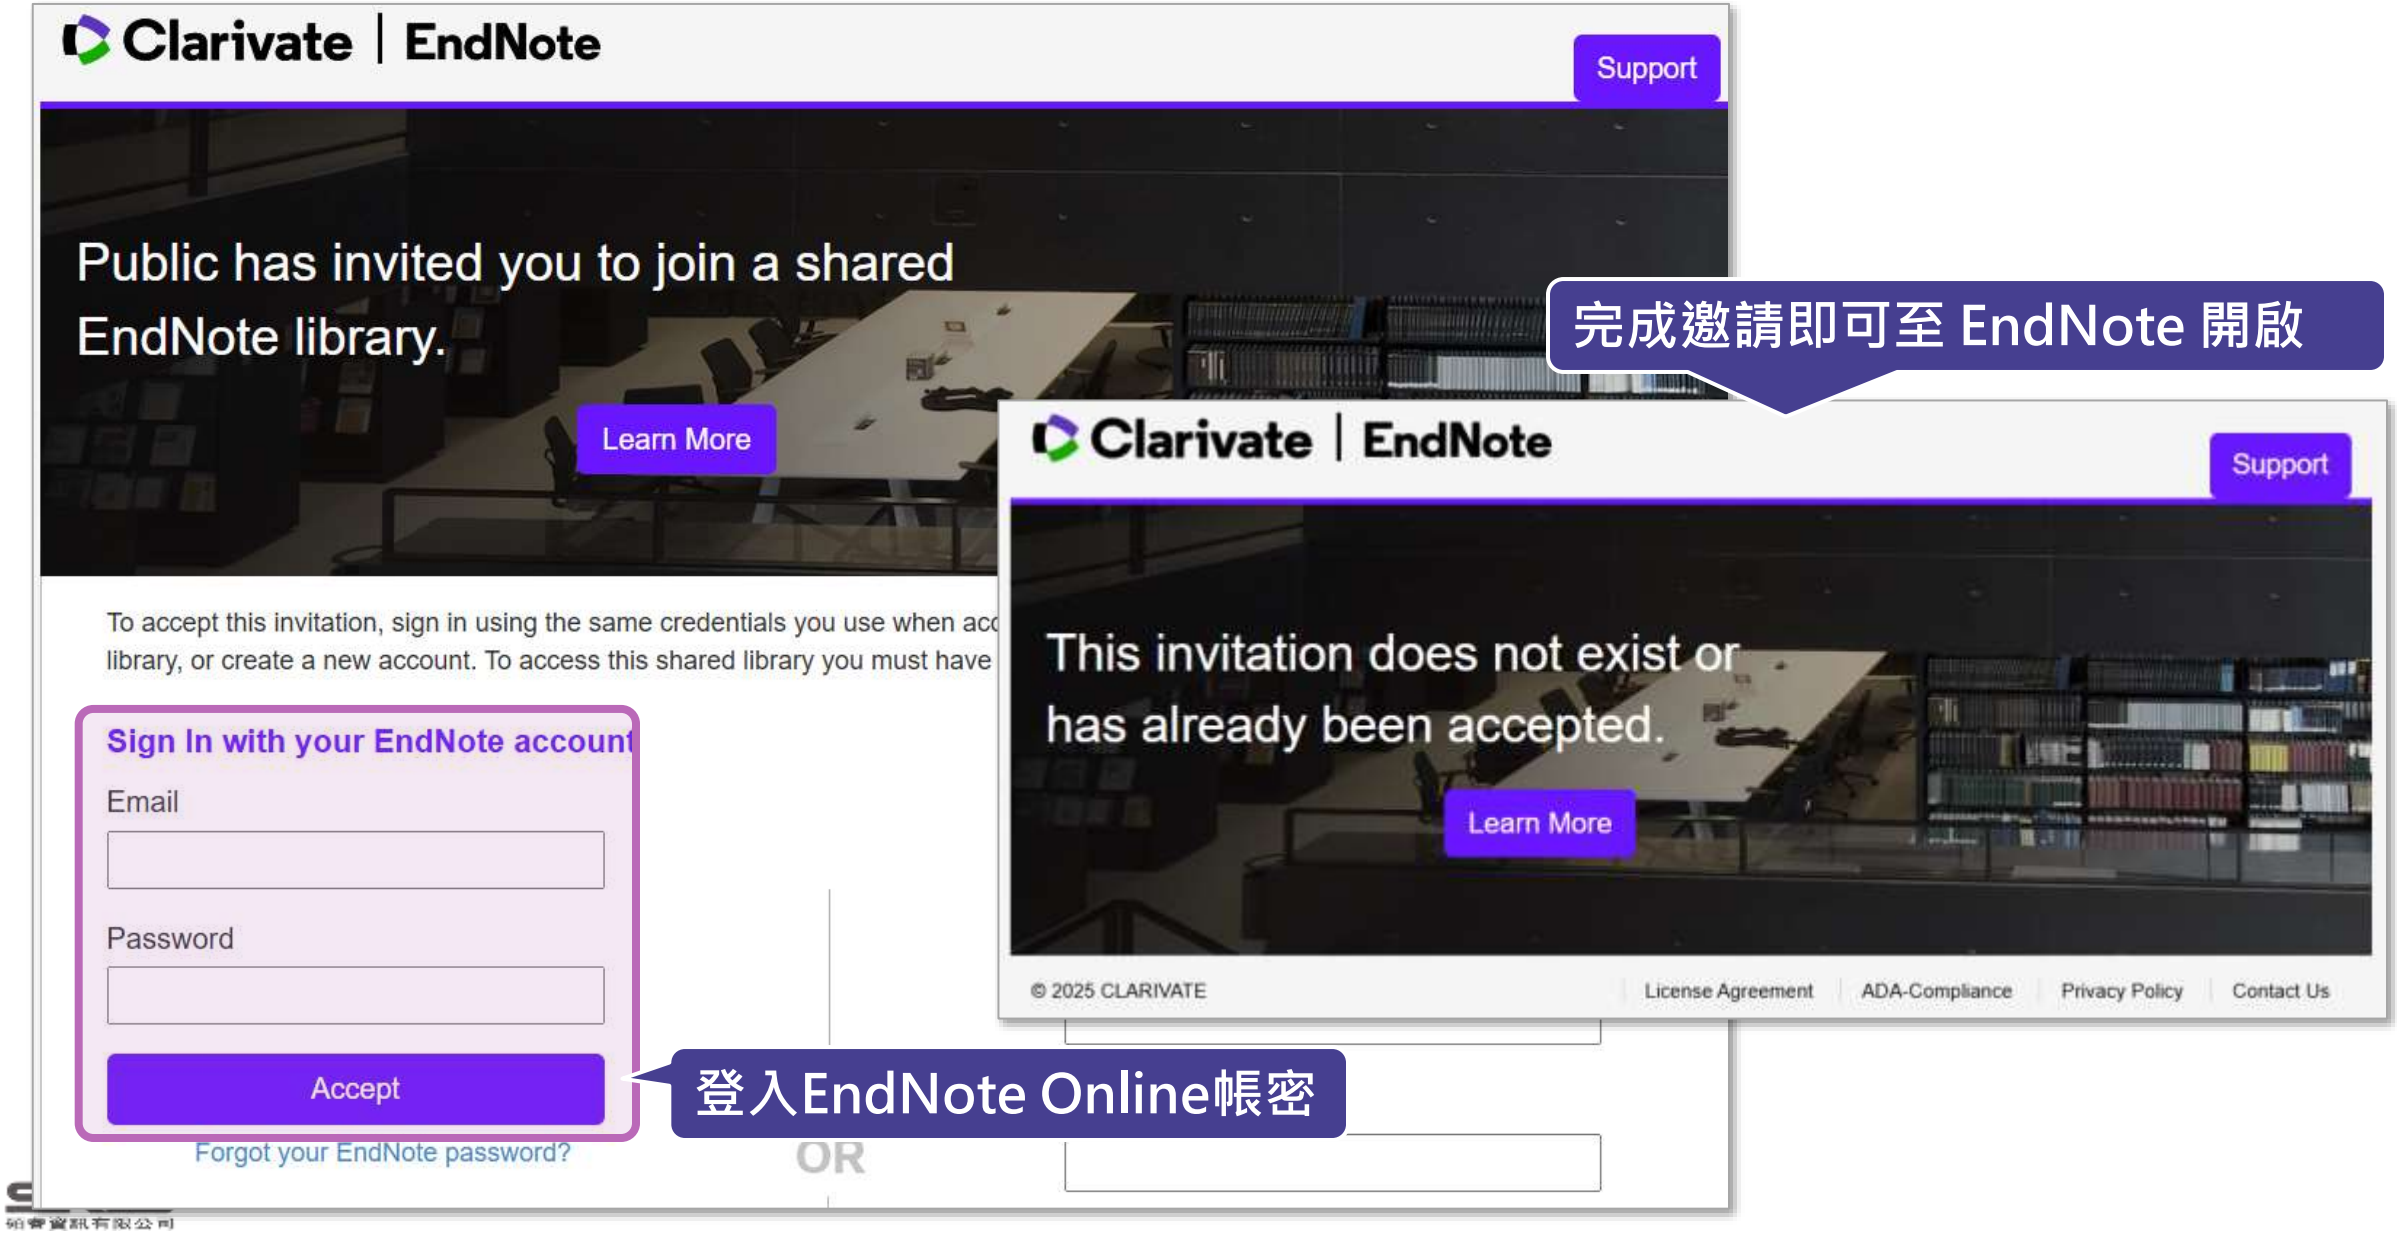

點擊連結同意邀請

Accept: https://account.endnote.com/enwservices/invitation/#/20396646-9206-4f71-aaec-596b8c73b40d

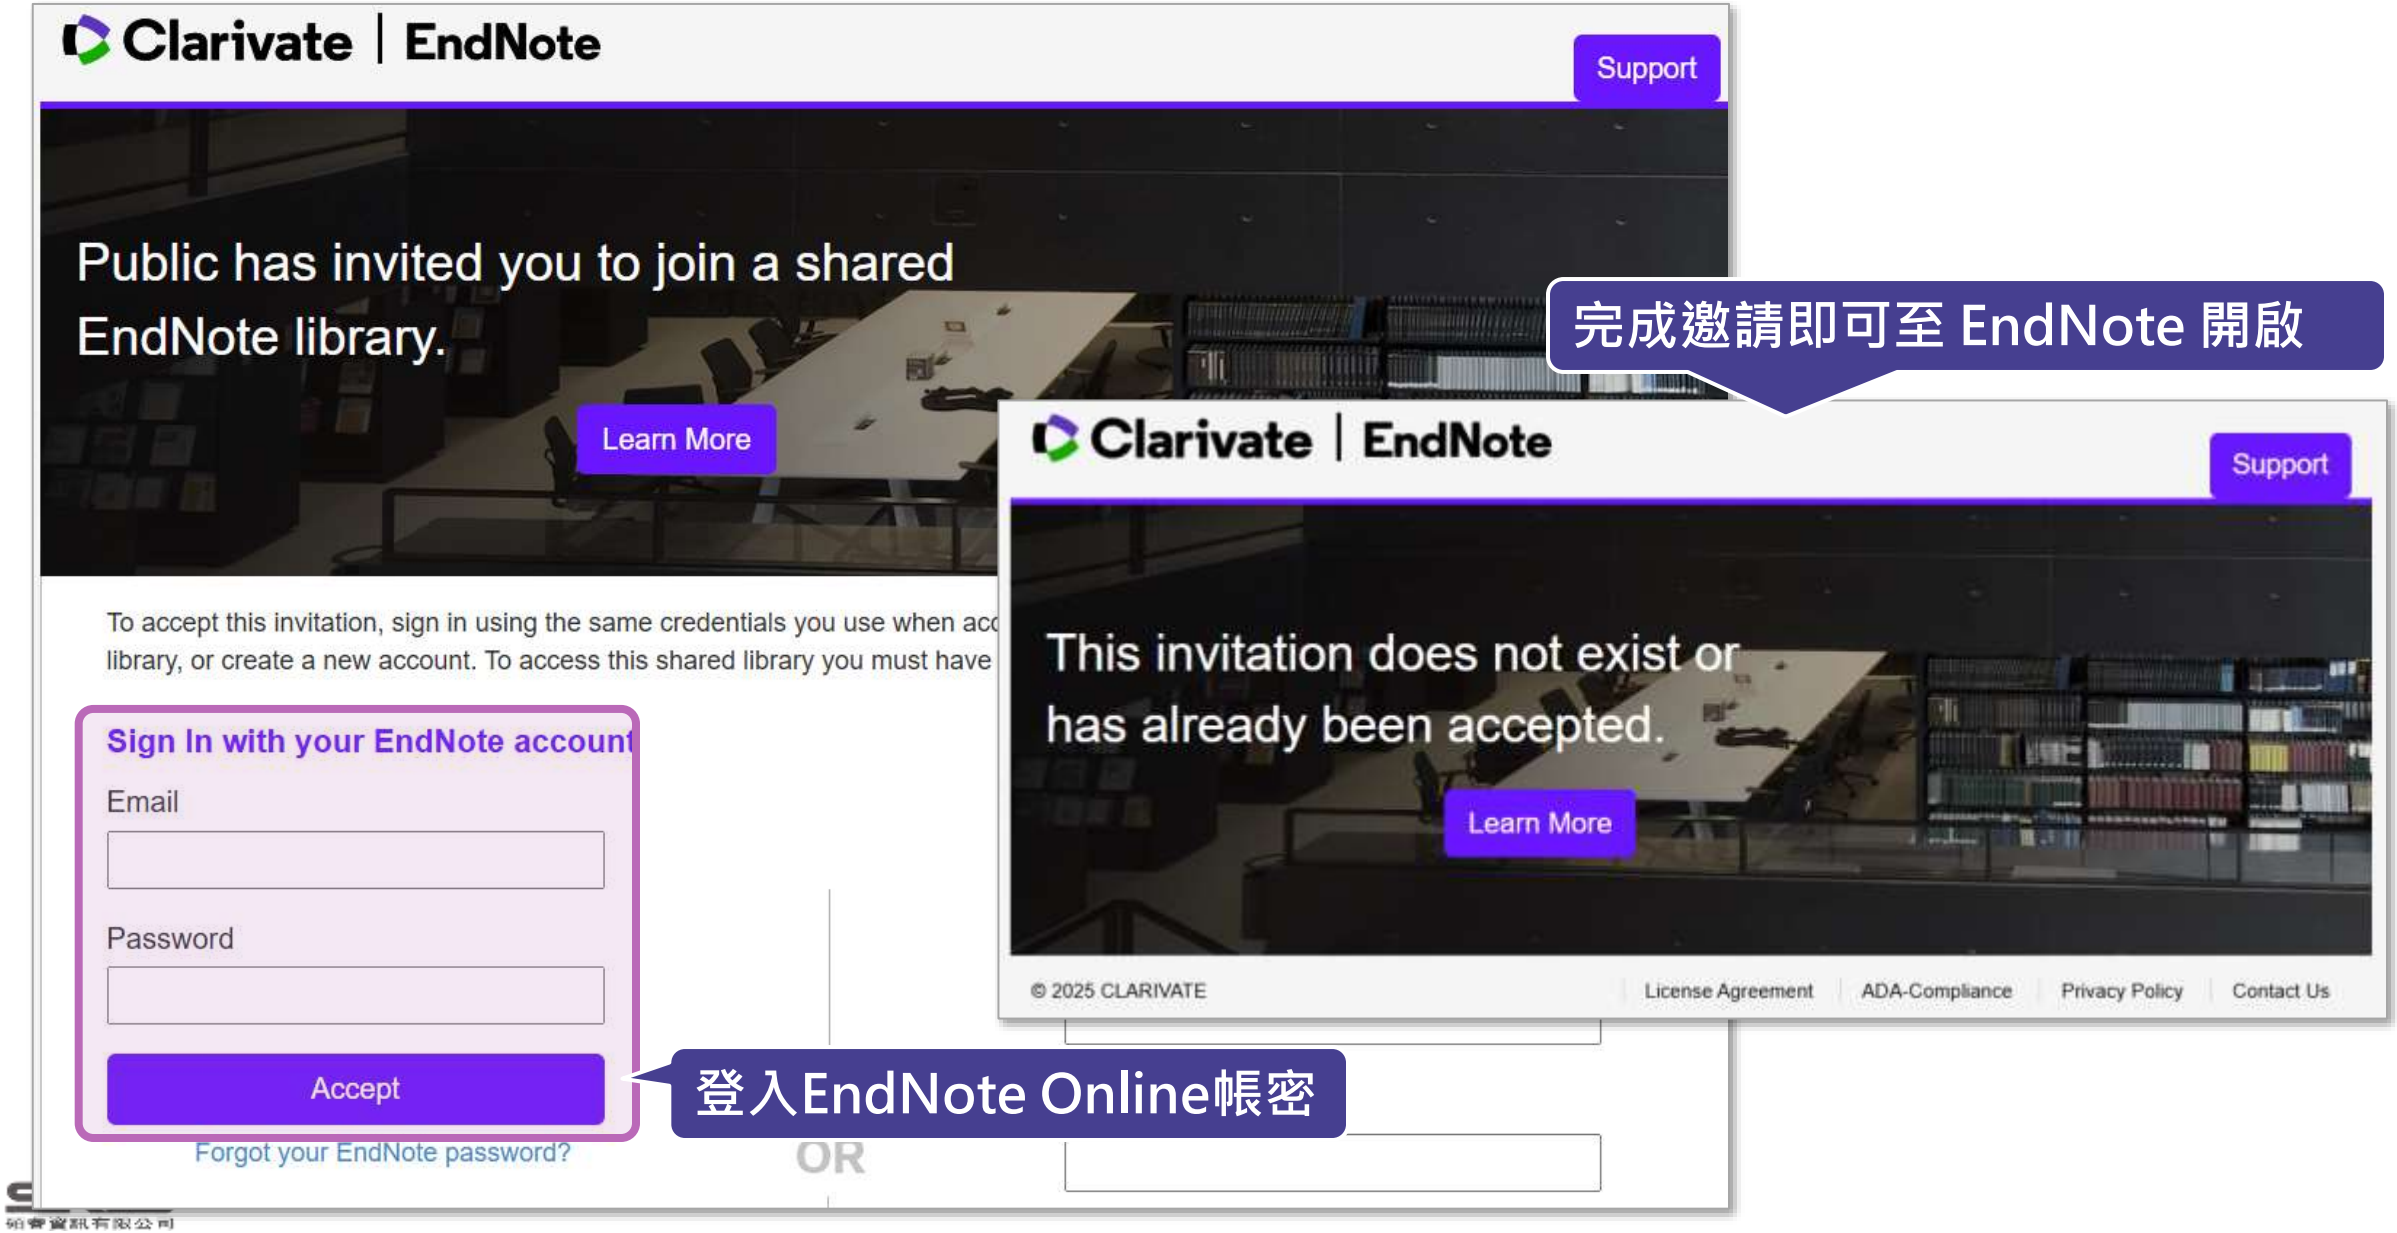

Don't have EndNote for your desktop yet? Get the latest version now to access shared libraries and much more.
http://endnote.com/buy?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=buy-en

Learn more about sharing your research with EndNote. http://endnote.com/?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=learn-more

1 **Applications of Generative Adversarial Networks (GANs): An Updated Review**

Alqahtani, H; Kavakli-Thorne, M and Kumar, G

Mar 2021 | ARCHIVES OF COMPUTATIONAL METHODS IN ENGINEERING 28 (2) , pp.525-552

Generative adversarial networks (GANs) present a way to learn deep representations without extensively annotated training data. These networks achieve learning through deriving back propagation signals through a competitive process involving a pair of networks. The representations that can be le: ... 顯示更多
